

Channel Position Guide

WHEN USING A CABLE CONVERTER BOX OR SATELLITE RECEIVER.

The following channel position guide is designed to help you find WXEL and its associated digital sub-channels through the various cable and satellite providers operating in the Palm Beaches and Treasure Coast. It is organized by community and zip code and includes a detailed listing of cable and/or satellite providers serving each area. The guide was prepared from the most current information available. However, systems can vary widely and we regret any errors or omissions. Please contact WXEL with corrections or additions. We will make every effort to update this listing to ensure its accuracy and completeness. Thank you for supporting WXEL-TV & FM.

Digital Television

WHEN RECEIVING WXEL'S SIGNAL DIRECTLY OVER-THE-AIR OR THROUGH A CONNECTION TO A CABLE SERVICE WITHOUT USING A CONVERTER BOX.

REPEATERS

In addition to its main signals, WXEL is also carried on two repeaters. WXEL repeaters are necessary as WXEL’s main signal does not reach all of its viewers in the Treasure Coast.

<i>Call Letters</i>	<i>Channel</i>	<i>City of License</i>	<i>Licensee</i>	<i>Type</i>
W44AY	44	Fort Pierce	Barry University	Analog
W31DC-D	31	Fort Pierce	Barry University	Digital

W31DC-D broadcasts on UHF channel 31. However, through the use of PSIP, digital television receivers will display W31DC-D’s virtual channel as 44.
